Pakistan - Available Internationally | English (Fluent) - Urdu (Fluent) - Arabic (Beginner)

## PROFILE

Self-taught software engineer with 5+ years of hands-on experience shipping real products. Specialising in Flutter and full-stack engineering, I've solo-built two live SaaS platforms, two consumer apps with 1,500+ combined users, and AI-powered systems for clients - handling everything from architecture to deployment. Currently pursuing a BSc in Computer Science and a BBA.

## TECHNICAL SKILLS

<b>Flutter &amp; Dart</b>	Cross-platform (iOS, Android, Web) - Custom state management & ValueNotifier - GoRouter - Custom Painter - Implicit & explicit animations - Platform Channels - Responsive UI - Dark/Light theming - PDF generation - Dart isolates - Deep linking - Stripe payments - Local notifications - Background services - App Store & Play Store deployment
<b>Firebase</b>	Authentication (Email, Phone) - Firestore (real-time listeners) - Cloud Functions - Cloud Messaging (push notifications) - Firebase Storage
<b>Backend</b>	Node.js & Express.js - REST API design - WebSocket servers - Cron jobs - Email integration - File handling & uploads
<b>Real-Time</b>	Firestore real-time listeners - WebSocket implementation - Live chat systems - Push notifications (FCM)
<b>Security &amp; Auth</b>	JWT authentication - OAuth integration - API key management - Phone & email/password auth flows
<b>Infrastructure</b>	VPS setup & management - cPanel & WHM - DNS - SSL certificates - Cloudflare R2 - iRedMail/iRedAdmin email systems - Custom SMTP/IMAP
<b>AI / LLM</b>	OpenAI API integration - Gemini API integration
<b>Databases</b>	Firebase Firestore - PostgreSQL - SQLite
<b>Languages</b>	Dart (Expert) - JavaScript (Comfortable) - Python (Intermediate) - SQL - HTML/CSS
<b>Tools</b>	Git & GitHub - VS Code - Xcode - Postman

## LIVE PRODUCTS & SAAS

### **BuilderSolve** *Live SaaS - Solo Build - Self-Owned*

[buildersolve.com](https://buildersolve.com)

Construction project management platform and direct competitor to Buildertrend. Built entirely solo - from cross-platform mobile and web app to backend infrastructure, hosting, and deployment. Serves real users in the construction industry. Includes a custom AI RAG system powered by Gemini that allows users to query company data using natural language.

**Stack:** Flutter (Mobile + Web), Firebase, Node.js on VPS, Gemini API (RAG)

### **urBox.ai** *Live SaaS - Solo Build - Self-Owned*

[urbox.ai](https://urbox.ai)

Shared inbox and team email management platform, competing with Front. Features a Flutter web frontend, Node.js backend with full email system integration, Firebase for real-time data, and fully hosted on a self-managed VPS.

**Stack:** Flutter Web, Node.js, Firebase, VPS

## CLIENT WORK

### **AI Contract Redlining Agent** *Client Work - Active*

AI-powered agent for automated contract redlining - analyses legal documents, identifies risk clauses, and suggests revisions. Delivered as a production system and still actively in use.

**Stack:** AI/LLM Integration, Node.js

### **Client Landing Pages with Admin Panels (x2)** *Client Work - Live*

Full landing pages with admin panels. Integrated custom mailing system allowing clients to send and receive emails directly from their admin panel via SMTP/IMAP.

**Stack:** HTML/CSS, Node.js, Custom SMTP/IMAP Email System

**Influencer Website & Merch Store** *Client Work - In Development*

Custom website with blog and merchandise store for a prominent Pakistani influencer. Static build with Firebase Storage powering the blog section.

**Stack:** HTML/CSS, Firebase Storage

## PAST VENTURES

---

**BeFoods** *1,000+ Users - Discontinued*

Food delivery platform modelled after UberEats/Foodpanda. Built entirely solo, grew organically to over 1,000 users before being sunset.

**Stack:** Flutter (Mobile), Firebase

**Bizzko** *~500 Users - Discontinued*

Full e-commerce platform built solo. Reached nearly 500 users with complete product listing, ordering, and payment flows.

**Stack:** Flutter (Mobile), Firebase

**Video Sharing Platform** *Learning Project - Solo*

YouTube-style video sharing platform built with Firebase - video uploads, feeds, user profiles, and engagement features.

**Stack:** Flutter, Firebase Storage, Firestore

## EDUCATION

---

**BSc Computer Science** - Currently Pursuing

**BBA (Bachelor of Business Administration)** - Currently Pursuing

**A-Levels** - Completed

**Self-Taught Developer** - 5+ years of independent development since age 13
